## Key

**Note - If a product is listed more than once, the same product was tested multiple times in different areas to determine whether or not certain areas of a product (such as those that are vinyl) contain elevated levels of lead.**

**PPM = Parts Per Million.**  
**<LOD = Below the Limit of Detection.**

## Rating System for Lead

Color	Rating	Lead level	Notes
Red	Highly Contaminated	600ppm or above	The CPSC standard for lead in paint is 600ppm.
Black	Contaminated	Up to 600ppm.	19 states, including MA, have laws restricting lead in packaging at 100ppm.

## Rating System for PVC / Chlorine

Chlorine   PVC?
<b>&gt;10,000 p</b> The material is most likely PVC given the high level of chlorine in the product.
<b>&lt;10,000 p</b> The material is unlikely to be PVC.
